

Welcome to M&M, where precision meets reality.

We do precision machine work prototype and production. Our staff is accustomed to very tight tolerances and a wide range of exotic materials. We have a 9,000 square feet facility and 10 employees. Our quality manual is based on ISO-9000. We have all the gages and instruments required to do a 100% inspection on each part. We also provide high quality laser marking on all our parts.

Welcome to our website. We have several new features on our website:
